

SinkMaster

SinkMaster dispensers meet the need for filling large sinks with detergent and/or sanitizer in food service applications.

Convenient, point-of-use dispensing for manual warewashing

Model 883

As the focus on food service safety increases, more attention is being paid to the importance of manual warewashing. Hydro's SinkMaster allows you to conveniently fill large sinks with properly diluted solutions of detergent and/or sanitizer regardless of the size of the sink or how much solution is dispensed. No more guesswork on how much detergent or sanitizer to add, or worry about the training of new employees due to the high turnover in food service.

The SinkMaster was carefully designed to include the following benefits to food service operations:

- ▲ Ball valve operation allows use without holding or locking a button — labor productivity increases since employees can be doing other activities while large sinks are filling.
- ▲ Label graphics make the unit easy to use, even for first-timers.
- ▲ Ultra-lean metering tip is included for today's super concentrated sanitizers.
- ▲ Rugged stainless steel construction is hygienic and consistent with other food service equipment.
- ▲ Worker safety is increased since chemical handling is virtually eliminated.
- ▲ Chemical performance is optimized by consistent, appropriate dilution. Tough standards of food service hygiene become easier to maintain.

Specifications, options and accessories

Model	Flow Rate	Dilution Range		Products Dispensed
		Max.	Min.	
883	3.5 GPM	460:1	3.5:1	2
8831	4 GPM	460:1	3.5:1	2

Accessories:

- 138 Inlet water hose, ½" x 6', black
- 199 Adaptor kit (to install water inlet from overhead rinse arm)

SinkMaster systems are available with two types of educutors: *

- ▲ Hydro's E-Gap educutors, which provide backflow protection through use of an elastomeric sleeve. (ASSE 1055B Approved)
- ▲ Hydro's patented HydroGap II™ air gap educutors, which use a one inch gap of air between the water source and the chemical inlet to provide backflow protection. (ASSE 1055B Approved.)

* Check with Hydro's Customer Service department to find out which model is right for you.
