

EvoDose NXT

Safe. Intuitive. Modular.

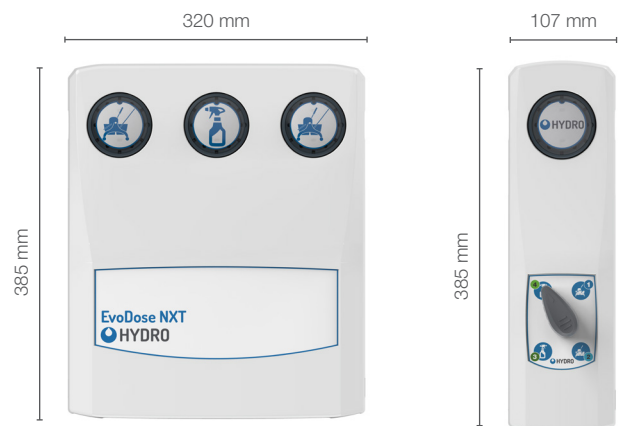

As the only dispenser on the market meeting the most stringent European water regulations, the EvoDose NXT helps prevent your water system from being contaminated as a result of the backflow of chemicals. The newest innovation is our EvoDose product that features pressure regulation technology and enables a 95% accurate dilution for the cleaning and sanitization of kitchens, restaurants, hotels, hospitals, schools, care homes, and numerous other applications where you need a confident clean.

The new intuitive and ergonomic button lock can fill containers hands-free, while ensuring the perfect dilution through our metering tips. Need more than one dispenser? The EvoDose NXT's modular design can easily be daisy chained, providing simple installation, and removing the need for additional accessories.

Due to its simplistic, three-part construction, you can easily save time during dispenser maintenance while also reducing your spare parts inventory. Brand customization of the unit is also available upon request.

EvoDose NXT Benefits

- Pressure regulating technology
- Eliminates dilution variance
- Hydro Systems' dilution tips provide 95% accuracy
- Can reach a dilution ratio from 4:1 to 390:1 for bucket fill applications and 3:1 to 120:1 for bottle fill applications

EvoDose NXT 1 Button and QDV: 107mm x 120mm x 385mm

EvoDose NXT 3 Button: 320mm x 120mm x 385mm

EvoDose NXT Features

- Meeting stringent European water regulation standards (WRAS, DVGW etc.) to prevent backflow and contamination of drinking water systems
- EvoDose NXT has a slim profile, small footprint, and easy to clean surface
- Modular design that allows for easy daisy chaining with no additional accessories needed
- Single-touch button operation
- Button lock is standard for both high flow (HF) and low flow (LF) options
- Intuitive and ergonomic button design for quick fill and multitasking needs
- Customization available
 - Features large display area for branding and chemical labeling
- Easy installation through keyhole and slotted screw holes
- Three main components allow for fewer parts to stock and maintain
- Tool-free maintenance for disassembly and reassembly
- Water connectivity types: Snap fit connector & 3/4" male thread
- QR code user manual directly on device reduces paper and document storage

Model	Eductor Configuration	Water Connection KIT
HYD-EDN-1H-G	Single Product - 1HF	JG15mm, 3/4" MBSP
HYD-EDN-1L-GS	Single Product - 1LF	JG15mm, 3/4" MBSP
HYD-EDN-3LHH-GS	Three Product 1LF x 2HF	JG15mm, 3/4" MBSP
HYD-EDN-3LLH-GS	Three Product 2LF x 1HF	JG15mm, 3/4" MBSP
HYD-EDN-3LLL-GS	Three Product 3LF	JG15mm, 3/4" MBSP
HYD-EDN-3HHH-G	Three Product 3HF	JG15mm, 3/4" MBSP
HYD-EDN-QLLHH-GS	QDV - 2HF + 2LF	JG15mm, 3/4" MBSP
HYD-EDN-QLLLH-GS	QDV - 3LF + 1HF	JG15mm, 3/4" MBSP
HYD-EDN-QLLLL-GS	QDV - 4LF	JG15mm, 3/4" MBSP
HYD-EDN-QHHHH-G	QDV - 2HF + 2HF	JG15mm, 3/4" MBSP

The EvoDose NXT was developed in accordance with the European standard EN1717, which prevents backflow and contamination of water systems. This makes it a safe and reliable solution for diluting chemicals in various industrial and commercial environments.
