

EvoOne

Versatile Push-Pump System for Accurate Chemical Dosing

The EvoOne is an innovative push-pump chemical dispenser designed to deliver accurate doses of concentrated chemicals into sinks, buckets, bottles and other containers. Its attractive and compact appearance makes it well-suited for customer facing areas without being intrusive.

The EvoOne does not require a water line connection dispensing directly into the desired container and allowing it to be versatile in a variety of environments.

- Adjustable dosage 5-30 mL (0.2-1.0 oz.), in increments of 5 mL (0.2 oz.)
- Simple and low cost installation with low service requirements
- Optional lock out system to prevent double dosage
- Exclusive chemical cap system to prevent the possibility of a competitor's chemical being used
- Chemical compatibility with a wide range of chemicals (standard and premium seal versions available)
- Simplified design with few moving parts, reducing possibility of failure and eliminating downtime
- Optional lockable concentrate cabinet
- Modular wall bracket system for simplicity and flexibility of install (the brackets clip together using a joiner piece)
- Spray bottle, sink and bucket fill options available
- Key or button operation of concentrate cabinet and dispenser priming feature, customizable upon installation
- Branding areas available to allow customization of dispenser and cabinet
- Adjustable height bottle shelf to facilitate easy chemical filling
- High quality tubing for delivering chemical (viscous chemical kit available)
