

Dositec Electromagnetic System

Electromagnetic Multi-Washer Unit for On-Premise Laundry

Dositec Electromagnetic Multi-Washer Units are designed for a wide range of applications including both on-premise and industrial laundries.

The system makes maintenance more economical by eliminating the need to change squeeze tubes. It also includes a rotameter, which gives an accurate confirmation of chemical delivery.

Flexible and Easy to Configure

- Panel mounted design
- Built in touch screen with PLC based control
- Units support up to 6 machines with up to 8 products

Accurately Dispense Chemicals and Reduce Downtime

- Integrated rotameter gives a positive indicator of chemical delivery
- Reliable, accurate electromagnetic pump (0.18 GPM or 0.7 LPM)
- Configurable water flush between each dose

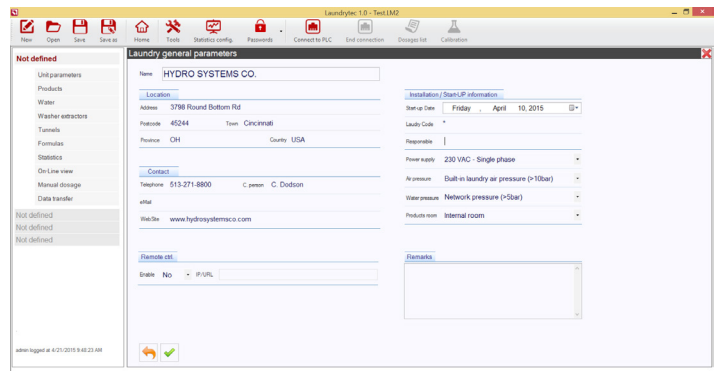

Laundrytec Software

All Dositec systems feature the Laundrytec software for complete wash aisle management. The Laundrytec software is web-based, real-time software designed to give you complete reporting and control for a comprehensive view of your entire wash aisle at all times.

Dositec's Laundrytec software features:

- Remote wireless and ethernet programming
- System monitoring
- Reporting for process and load efficiency
- Formula run times
- Chemical usage
- Production efficiency

Hydro Systems is the leading manufacturer globally of chemical management systems for several markets, including commercial laundry. Dositec Sistemas is a leading manufacturer of central laundry and large on-premise laundry dosing systems in Europe. At the core of all Dositec equipment is the Laundrytec software platform.
