

Depletion Wand

Robust Drum Interface for Efficient Chemical Uptake

Depletion wands simplify laundry installations by allowing quick connections between a single chemical drum and up to three laundry dispensers. In addition to limiting chemical spills and increasing the efficiency of replenishing product drums, the depletion wands come equipped with a float switch that can detect and alert users to costly out-of-product conditions. This reduces the risks of poor results and rewash.

- Eliminate messy or unneeded pickup tubes with a 3-way system that allows one container to supply up to three separate dispensers
- Detect costly out of product conditions with a built-in low level float sensor
- Durable, reliable design using injection moulded plastic
- Versatile design with multiple options to support global customer needs
- Prolong wand life with serviceable non-return valves that can easily be removed or cleaned in the field
- Two material grades including EPDM and Perfluoroelastomer

- Multiple sizes to fit different chemical containers, including 20L/5Gallon
- Flexible to connect to an EvoClean dispenser or standalone alarm unit

Product Number	Description
HYDDW20L0500D3EPF	DEPLETION WAND, 48D, 500MM, 20L (5G), EP, GLOB.
