

## POST COVID-19 START UP CHECKLIST

We are committed to getting you back up and running, safely and efficiently.

Please follow this guide to ensure that your Hydro dispensers are ready to use when your business needs them.

### RECOMMENDATIONS FOR PERISTALTIC DISPENSERS

Inspect all chemical tubing and connections for leaks, damage, or loose connections.

Inspect electrical connections for signs of damage and repair as needed

Inspect and soak check valves and elbows in warm water as needed to remove chemical deposits

If the dispenser has been inactive for 30 days, it is recommended that all squeeze tubes are replaced

Flush each chemical path with water - **MUST** be done before removing squeeze tubes

- Disconnect discharge tube from equipment being dispensed to or flush manifold unit
- Route discharge tube to a drain or secure to a container capable of holding residual chemical and water used to flush device (empty container between each flush)
- Place suction lance or chemical pickup tube into a container of fresh water
- Using the PRIME feature of the dispenser, prime the pump until you see clear water being discharged into the drain
- Repeat for each chemical line
- Once complete and all other parts have been inspected, reconnect to the equipment and squeeze tubes can now be removed

Ensure all product pickup tubing is primed. If priming is difficult, the tubing may need to be replaced

**PLEASE NOTE:** Take caution to not allow incompatible chemicals to mix together  
Ensure dispenser has been fully reconnected and recalibrated before use  
Please refer to product manual for extra guidance on specific tasks

If unsure of any of these processes at any time, please contact Hydro Systems for further information

# Replacement Squeeze Tubes

Should you need to replace the squeeze tubes of the dispenser, please use below chart to find the correct part numbers

## Warewashing Squeeze Tube Part Numbers

PART NUMBER	DESCRIPTION
HYD13-06399-10	EPDM,-368,DETERGENT,1/4IN,10PK
HYD13-06395-10	EPDM,-377,RNS,1/4IN,10PK,91060

## Top Load Laundry Squeeze Tube Part Numbers

PART NUMBER	DESCRIPTION
HYD13-08601-10	EPDM,-368,DETERGENT,1/4IN BARB

## LM-200 / LM-100 Squeeze Tube Part Numbers

PART NUMBER	DESCRIPTION
HYD13-07786-10	SILICONE,-142,10-PACK
HYD13-07982-10	SANTOPRENE,-242,10-PACK
HYD13-07977-10	VITON,-442,10-PACK
HYD13-06720-10	EPDM,-642,10-PACK,960600

## LL-60000/80000 Squeeze Tube Part Numbers

PART NUMBER	DESCRIPTION
HYD13-07974-10	SILICONE,-153,10-PACK
HYD13-07983-10	SANTOPRENE,-253,10-PACK
HYD13-07978-10	VITON,-453,10-PACK
HYD13-07996-10	EPDM,-653,10-PACK
