

# Dositec Multi-Washer Systems

## Multi-Washer Units for On-Premise and Industrial Laundry

Dositec Multi-Washer Units are designed for a wide range of applications including both on-premise and industrial laundries. We offer a complete family of products that feature a range of controls and pump options depending on the laundry size and needs. The systems feature a consolidated footprint, provide professional reports and make maintenance more economical by eliminating the need to change squeeze tubes.

All Dositec Multi-Washer Units have the ability to communicate remotely through Hydro Connect. This means clients can access reporting information and make configuration changes remotely from any global location with an internet connection versus making costly site visits. Users report saving up to 90% in maintenance costs as a result.

### Flexible and Easy to Configure

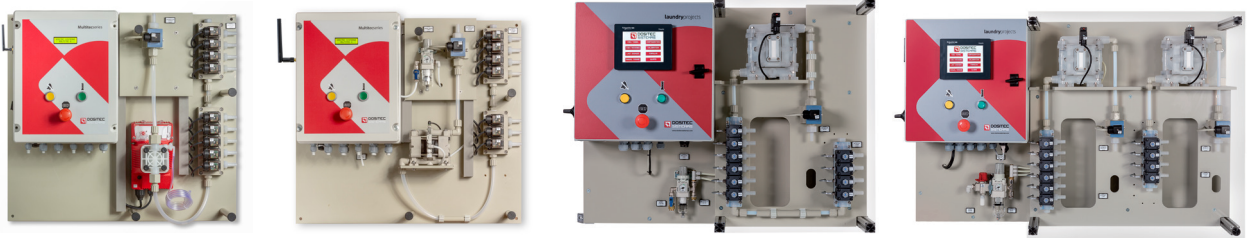

- Panel mounted design – consolidated footprint offers up to 35% space savings
- Built in display with PLC or PCB based control
- Units support up to 10 machines with up to 10 products
- Make configuration changes remotely – examples include adding a formula, changing a dosing amount, or switching a unit from flow meter to time mode
- Configurable water flush between each dose
- Reduce rewash and precisely control each dispense through an accurate flowmeter

### Hydro Connect

Hydro Connect is a cloud-based Internet of Things (IoT) platform that gives chemical providers and end users increased visibility into their operations, optimizes production, reduces costs and increases customer satisfaction. Built on the Microsoft Azure platform, Hydro Connect utilizes data generated from the Dositec Central Dosing Systems to provide valuable, actionable insights along with simple observations and recommendations. Additionally, clients can make configuration changes without traveling to sites.
